In 2050, the city of Palermo values smart, ecological buildings, spaces and mobility. Palermo cherishes its historical city centre and cultural heritage. These are enriched by new technologies and innovation to create comfortable, energy-efficient housing and workplaces.

In 2050, the city of Palermo cherishes its historical city centre and cultural heritage. These are enriched by new technologies and innovation to create comfortable, energy-efficient housing and workplaces. Palermo values being a social harbour, open and friendly to all, as well as a cultural hub, enriching people's lives and helping to make good citizenship and sustainable transport second nature for everyone.

A green mobility network

A green mobility network is implemented to enable sustainable behaviour and businesses. There is an emphasis on small-scale ecological solutions, such as smart individual delivery of (personal) goods in platform-based on new technologies. Good transport management also allows demand-driven diversity including walking, bike, scooter, and car sharing, as well as tram and bus connections to the outlying areas. Individual solutions are accessible and affordable, supported by local entrepreneurs in new business models and both public and private investments.

A social harbour

A social harbour is an open and friendly living, entertaining and all-in, while retaining its unique interactions and traditions.
